

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Brompton Adventurous Fund (“the Fund”) A Accumulation Retail Shares The Fund is a Sub-Fund of VT Brompton Funds ICVC The Fund is an Open Ended Investment Company. (ISIN: GBOOBYZCNT84)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The Fund aims to generate capital growth (i.e. the increase in the value of the shares in the Fund) over the longer term (at least 5 years).

The composition of the portfolio will reflect the Investment Manager's view of the potential future return of different asset classes and specific investments - for this Fund the Investment Manager aims to take an adventurous approach, with a greater proportion of the fund exposed to assets which it considers 'higher risk' (such as certain equities) and less on those which may be 'lower risk'.

The Fund will be actively managed and will typically invest at least 80% of its Net Asset Value in collective investment schemes (including exchange traded funds and investment trusts, and which may include schemes which are managed and/or advised by the ACD and/or Investment Manager).

The Fund will generally be exposed to equity markets. However, the Fund will also have exposure (directly or indirectly) to other asset classes such as fixed income and alternatives (including, but not limited to, UCITS Long Short funds, market neutral funds and, structured products), although exposure to such assets will not exceed 35% of the Net Asset Value of the Fund except in exceptional circumstances (e.g. where the Investment Manager anticipates sharp falls in asset values due to severe market stress).

The Fund may also invest directly in transferable securities (including equities), money market instruments, cash and near cash.

Investments will not be confined by geographical, industrial or economic sector.

Derivatives may be used only for Efficient Portfolio Management (including hedging) in accordance with the FCA Rules. Efficient portfolio management means using derivatives in a way that is designed to reduce risk or cost and/or generate extra income or growth. Derivative use is expected to be limited.

Any income this share class generates will be re-invested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

The Fund is ranked 5 because funds of this type have experienced relatively high rises and falls in market prices historically.

Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The lowest category does not mean "risk free".

The indicator does not take into account the following risks of investing in this Fund:

- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- This Fund can use derivatives to protect from price and currency movement. This may result in gains or losses that are greater than the original amount invested.

For further risk information please see the "Risk Factors" section of the prospectus.
