

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest

VT Global Total Return Fund (“the Fund”) a sub-fund of The Mulben Investment Funds (“the Company”) Class F Institutional Accumulation (ISIN: GB00B4VWT948)

The Fund is an Open Ended Investment Company. icf management limited is the Investment Manager and Valu-Trac Investment Management Ltd is the Authorised Corporate Director of the fund.

Objectives and Investment Policy

The objective of the Fund is to achieve capital and income growth over the long term (5 years). Capital is in fact at risk, and there is no guarantee that the investment objective will be achieved over a five year, or any, period.

The Fund will seek to achieve its objective by investing at least 70% in collective investment vehicles (both active and index tracker (including investment trusts and exchange traded funds) and which may include those managed and/or advised by the ACD or Investment Manager) to actively gain exposure (indirectly) to a broad range of asset classes (including equities, bonds (both investment grade and sub-investment grade), commodities, infrastructure and property) on a global basis, including emerging markets (those markets whose economies are in an emerging growth phase and offer higher potential return with higher risks than developed market countries).

The Fund may also invest directly in shares in companies, corporate and government bonds (both investment grade and sub-investment grade), cash, deposits and money market instruments (such as treasury bills).

In managing the Fund, the Investment Manager aims for volatility to be no more than two-thirds of that of the S&P 500. Derivatives may be used by the fund for efficient portfolio management and hedging.

The Fund may also invest directly in shares in companies, corporate and government bonds (both investment grade and sub-investment grade), cash, deposits and money market instruments (such as treasury bills).

The Fund is known as a 'fund of funds' because it invests in a wide range of collective investment schemes that aim to grow your investment. The Fund will also invest in stock exchange listed investment companies and money market funds.

The Fund has the discretion to invest in a range of investments as described above.

Any income the Fund generates will be reinvested to grow the value of your investment.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) may be used for efficient portfolio management purposes.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk			Higher Risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

The Fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The lowest category does not mean "risk free".

The indicator does not take into account the following risks of investing in this Fund:

- The Fund may invest in cash and cash equivalent securities to try to protect its value in times of market uncertainty, but this may not always be successful.
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may reduce the value of your investment.
- Investing in other open ended collective investment schemes may expose investors to increased risk due to restrictions on withdrawals, less strict regulations, and use of derivatives.
- The Fund may invest in closed end funds which have a fixed number of shares in issue and may not be as easily sold as an open ended collective investment scheme. The shares of the Fund may be bought or sold by a broker at a premium or a discount.

Charges

The charges you pay are used to pay the costs of running the Fund including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0%
Exit Charge	None

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year	
Ongoing Charges	2.90%

Charges taken from the fund under specific conditions	
Performance Fee	None

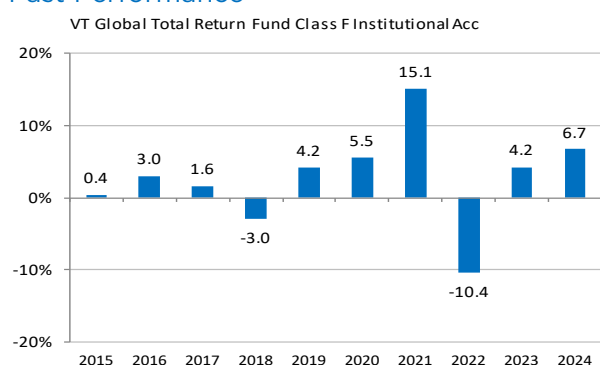

Switching charge (for switching into the Fund from another fund) is 0.00%

The ongoing charge is based on the current expenses chargeable and net asset valuation as at 31 December 2024. It excludes the costs of buying or selling assets for the Fund and includes an estimate of the charges the Fund incurs as an investor in the underlying funds it invests in.

You may also be charged a dilution levy on entry to or exit from the Fund.

For more information about charges, please see section 13 of the prospectus.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.

The share class was launched on 18 August 2010.

The Fund launched on 11 August 2010.

Performance is calculated in Pound Sterling
