Objectives and Investment Policy

The investment objective of the Fund is to generate income and preserve capital with potential for capital growth.

The Fund will aim to meet its objectives by investing primarily (at least 70%) in equities (which are mainly listed in the United Kingdom and whose primary activity is in the wider infrastructure sector of the United Kingdom).

In addition to investing in equities, the sub-fund may also invest in other transferable securities, bonds, collective investment schemes, money market instruments, deposits, cash and near cash.

The Fund will have a specific focus on investments denominated in Sterling, which are themselves invested in Sterling assets and which have most or all of their activities within the UK. Other than as noted above, the Fund has no particular emphasis on any geographical area or industry or economic sector.

The Fund has the discretion to invest in a range of investments as described above.

Hedged Share Classes aim to protect investors from exchange rate fluctuations between the Fund's underlying investments and the currency of denomination of the Class (Sterling).

You can buy and sell shares in the fund on any business day.

Any income from the Fund will be reinvested to grow the value of your investment.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

← Lower Risk				Higher Risk →		
Typically Lower Rewards				Typically Higher Rewards		
1	2	3	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 5 because weekly historical performance data indicates that it has experienced relatively high rises and falls in market prices historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease. Currency hedging techniques applied to hedged Share Classes may not entirely eliminate the effects of changes in exchange rates, therefore it cannot be guaranteed that the hedging objective will be achieved.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
