

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Lyndon Fund (the "Fund")

a sub-fund of VT Contra Capital Funds ICVC (the "Company")

Class A Accumulation Shares (ISIN: GBO0BGMJSC47)

Class A Income Shares (ISIN: GBO0BGMJSD53)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to achieve long-term (5 years) total returns comprised of income and capital growth. Capital is in fact at risk and there is no guarantee that a positive return will be achieved over a five year, or any, period.

The Fund will be managed actively with a long-term investment horizon and investments will largely be determined by the application of a contrarian investment process (that is investments will be often be selected on the basis that the manager considers that they are, at the time of purchase, overlooked and underestimated by the wider market).

At least 70% of the Fund will be invested in direct equities.

The Fund may, at times, invest in a relatively small number of equities, the selection of which will not be restricted either by size, industry, or geographical location of the underlying companies.

The Fund may take investment exposure equities, fixed interest instruments, cash and near cash (which includes money market instruments and deposits in any currency), commodities, property and alternative assets (such as hedge funds and private equity funds).

Any such exposures could be gained by direct investment or through funds, though no direct investments in property or commodities will be made and investment in alternative assets will be restricted to UCITS funds and transferable securities.

The Fund may use derivatives and forward transactions (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) for the purposes of meeting the investment objective or efficient portfolio management.

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

If you hold income shares, any income from the Fund will be distributed quarterly.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 6 because monthly historical performance data indicates that significant rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- Derivatives risk: use of derivatives may result in gains or losses that are greater than the original amount invested

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in `Practical Information` overleaf.
