Facial Recognition – A Step-By-Step Guide

Introducing SmartSearch

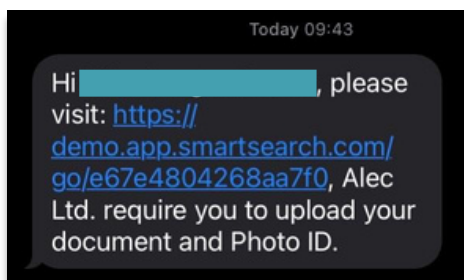

It is a regulatory requirement for regulated companies to verify your identity. This is so they can confirm you are who you say you are and helps them fight money laundering.

Typically, you would be required to take your identity documents to an office or send certified copies in the post. However, this is not always secure or reliable.

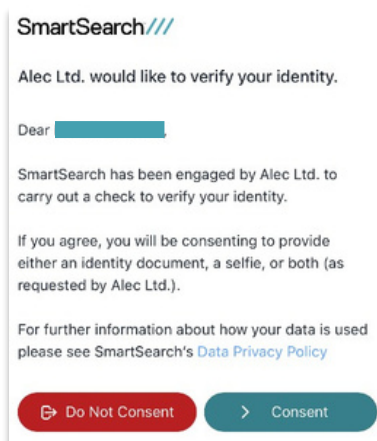

SmartSearch offers a safer and more convenient way for you to do this, via secure SMS or email upload. If you have been invited to submit an image of your ID document and selfie by a company, please follow the on-screen instructions on your device.

A step-by-step process is outlined below:

1. Click the SMS or email link on your mobile device

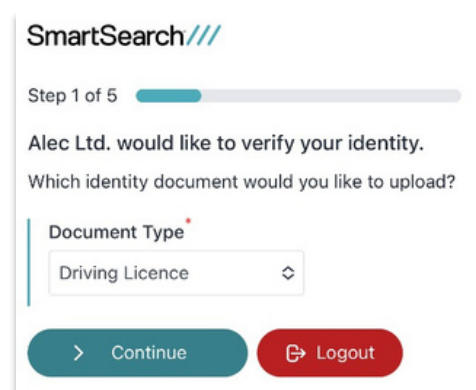

2. Consent to the process

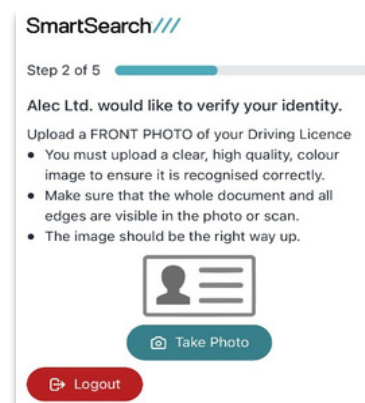

Click 'consent' to start the process. If you choose 'do not consent', the company who requested the identity check will be informed.

3. Select the document type you would like to upload

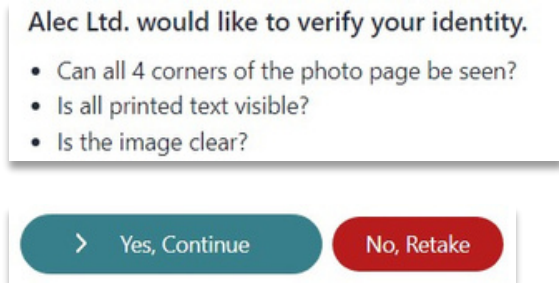

4. Take a photo of your identity document

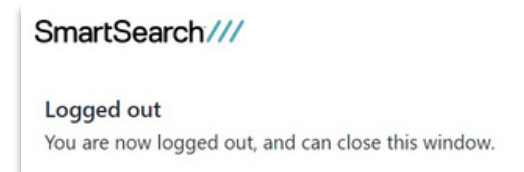

Facial Recognition – A Step-By-Step Guide

5. Submit your document image

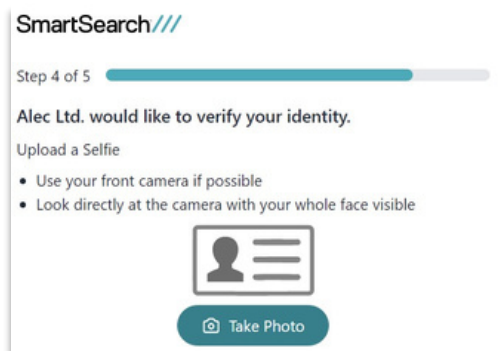

Click 'yes, continue', if you are happy that your document image meets the required quality guidelines. To retake an image, simply select 'no, retake'.

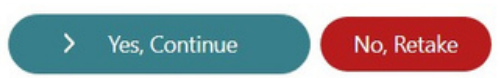

8. You will be prompted to then close your window. The process is complete

6. Take your selfie image

7. Submit your selfie image

Click 'yes, continue', if you are happy that your document image meets the required quality guidelines. To retake an image, simply select 'no, retake'.

Data Security

Data Security

SmartSearch: a company you can trust
